

Huron-Manistee National Forests
Huron Shores Ranger Station
Forest Road 4162 Wetland Restoration

The Huron Manistee National Forests plan to conduct restoration activities on National Forest system lands adjacent to Forest Road 4162.

Wetland vegetation and soils are being damaged by off road vehicles driving adjacent to an old borrow pit and into wetland areas. The Forest plans to place guard rail off of the edge of the 4162 roadway to limit motor vehicle access from off-road use. In addition, a small waterhole will be excavated to deepen and enhance the pond values for wildlife. The surrounding area that is void of vegetation will be seeded and mulched to reestablish vegetation.

This project covers less than 5 acres, and is described as: A spot in Section 10 of T22N R6E, Iosco County, Michigan Meridian as shown on the location map.

If you have any comments or additional information regarding this project please contact Gordon Haase, at the Huron Shores Ranger Station, 5761 North Skeel Avenue, Oscoda, Michigan 48750, telephone (989) 739-0728.

Project location south of Forest Road 4162
